NEWSLETTER VOLUME 3

THE UMTMS PROJECT TAKES A STEP FORWARD.

KA220-VET-F59FD236

The simulator

We are excited to share an update on our project's latest advancements! Recently, we completed a comprehensive review of our intellectual outputs and outlined the next steps needed to achieve the final version of our 3D simulator software. This review has been instrumental in helping us streamline our approach and ensure that each stage is aligned with our project goals.

Over the past weeks, the scenarios designed for the simulator were tested extensively. During this testing phase, we identified and resolved several bugs, moving us closer to our goal of creating an optimal, user-friendly version of the simulator. We are thrilled to announce that the scenario-based 3D simulator is now live and available for student use, marking a significant milestone in our project.

Additionally, the accompanying survey has been updated and is now ready to collect student feedback. We encourage students from each partner country to actively engage with the simulator and complete the survey. This input is crucial, as it will provide valuable insights and guide our improvements ahead of the upcoming Majorca Meeting.

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the National Agency and Commission cannot be held responsible for any use which may be made of the information contained therein.

It can also be used in adult education. Companies can benefit from this simulator as an element of increasing the quality in the in-service training of their staff in the scope of maritime. Disabled individuals who cannot continue their education due to health problems will be able to learn a lot of new information about ship machinery and vehicles in the engine room from where they are. Individuals' education and training will be able to continue thanks to this simulator.

NEXT STEPS

In the coming months, project partners will focus on testing and refining the simulator to ensure its functionality, accuracy, and usability. Thank you to everyone for your hard work and dedication to the success of this project. We look forward hearing your experiences and insights as we strive to perfect this educational tool!
